**UDLAP** is located in the heart of Mexico, in one of the most historic cities of Latin America: Cholula. This 2,500-year-old sacred city is famous because it houses the Great Pyramid of Cholula. It combines the modern and traditional aspects of Mexico, attracting tourists from all over the world year-round. Did you know Cholula's Great Pyramid is considered the largest man-made pyramid by volume in the world?

“From the moment that I arrived at UDLAP, I was embraced with warmth. I have the best roommate who has become my sister and I know that I will have the friends that I have made here for life. I have only been here for a little over a month and already coming to Mexico to study is the best decision that I have ever made. I don’t ever want to leave. The Mexican hospitality is overwhelming, the food is delicious, and the classes and professors at UDLAP are brilliant. I couldn’t think of a better place to come on exchange.”

## ■ VISITING STUDENTS

These students are considered Visiting Students who may temporarily enroll at UDLAP by paying the admission and tuition fees.

**Fall semester** (August-December): May 1st.

*Life on campus offers many activities, sports, restaurants, coffee shops, and a lively community of students.*

# DUAL DEGREE PROGRAMS

*The Dual Degree Programs are a new form of cooperation between two institutions to provide undergraduate and graduate world class education in two-country and two-university environments in order to graduate future leaders. This gives students the opportunity to learn in different linguistic and cultural environments, providing them with opportunities to broaden their academic horizons and work options. Dual Degree Programs include both academic courses and internships.*

*At the end of the program both universities award a degree to the student. UDLAP has partnerships with prestigious European and American universities to award dual degrees.*

“Spending two years in UDLAP has been an amazing experience in my studies and in my personal life. I have learned how to work with people from all over the world in an incredible environment. I have made the most of weekends and holidays by visiting the country and seeing all types of sceneries. Studying in Mexico has been a perfect way to complement my studies in France, associating two very different types of teaching and cultures.”
