Relationships with Other Society Areas of the Doctorate in Food Science

On behalf of the commitment to improvement, the academic staff of the Doctorate in Food Science has strengthened relationships with the food industry and regional, national and transnational organizations, in an effort to solve some challenges that they face through the development and innovation projects. The results of these relationships can be perceived through the national and international recognition of the academic staff, as well as in the funds obtained for research projects. Some organizations, which have
